

MINISYMPOSIUM

Hybrid structural approaches for clues to protein function

27 May 2011 14:00 Hall B, Kemicentrum

Greasy encounters: Structural biology of myelin, a multilayered membrane in the vertebrate nervous system

Petri Kursula

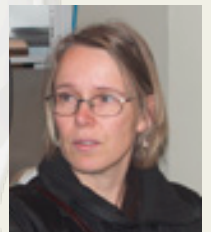

Centre for Structural Systems Biology, DESY, Hamburg, Germany & Department of Biochemistry, University of Oulu, Finland

Unexpected features of yeast LTA4 Hydrolase

Marjolein Thunnissen

Department of Biochemistry & Structural Biology, Lund University, Sweden

Using complementary structural biology methods to study allosteric regulation in ribonucleotide reductase

Derek T. Logan

Department of Biochemistry & Structural Biology, Lund University, Sweden

After the seminars

Pub in Biochemistry coffee room
