

Center for Molecular Protein Science
Lund University

MINISYMPOSIUM

9 SEPTEMBER 2011

13:15 LECTURE HALL C

Does a “prion-like” mechanism contribute to the spreading of neuropathology in Parkinson’s disease?

Patrik Brundin

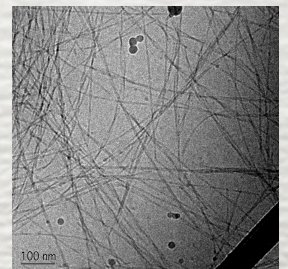

Department of Experimental Medical Science
Lund University, Sweden

Mechanistic insights into Aβ42 aggregation and effects of inhibitors

Sara Snogerup Linse

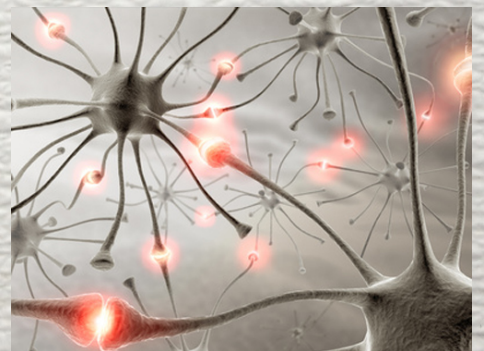

Department of Biochemistry and Structural Biology
Lund University, Sweden

Protein-protein interactions and function control in biology: Oligomerisation of yeast frataxin and iron-sulphur cluster assembly

Salam Al-Karadaghi

Department of Biochemistry and Structural Biology
Lund University, Sweden

After the minisymposium:

Pub in CMPS coffee room

Organised by CMPS PhD students: Eva-Christina Ahlgren, Risto Cukalevski and Egle Virzintiene
